Link to GSDML file location:

1. Navigate to: <https://www.wmfts.com/softwareanddevices/>

Notes:

1. If your pump software is compatible with multiple GSDML files versions it is recommended to use the latest version available.
2. In order to find your pump software version, select **Help**, then **Software** on your pump
3. The correct GSDML file version must be used in combination with the pump software versions listed for good communication between the pump and control system.
4. Networks using pumps with different software and GSDML versions are acceptable as long as each pump is using the correct GSDML version
